**AMERICAN
BUILDINGS**

A **NUCOR** COMPANY

Education has been one of the most active construction sectors for the past several years. The inherent flexibility of American Buildings Company's custom engineered framing systems allows for efficient design and production of not only classrooms but also large span areas such as gymnasiums, cafeterias and auditoriums.

American Buildings Company provides a versatile building solution. Our buildings can range from the basic to more sophisticated look and use of materials, while still providing quick turnaround of product and delivery. ABC uses advanced technology and design techniques to lead the way in building systems.

ONBUILDING

Educational Facilities

American's building systems can be readily combined with traditional materials such as brick, stone, glass, or wood to meet any appearance requirement, while American's technology dramatically shortens design, fabrication, and on-site erection time for major cost savings and faster occupancy.

You can choose Silicone-Polyester COOL™ panels or panels coated with SmartKote® PVDF. Both feature durable finishes that resist fading, extend the life of the structure and lower your energy costs.

ABC's SP-COOL™ panels, offered in 4 great colors, feature a 25-year finish warranty. SmartKote® finishes, available in a wide range of colors, can be warranted for an optional 35 years. American metal standing seam roofs are offered with 20-year weathertightness replacement warranties that include both labor and materials.

As part of Nucor Corporation, the largest steel company in the United States, American Buildings Company is one of the most vertically integrated manufacturers. We deliver our systems to the jobsite with our own transportation fleet.

We're represented locally throughout North America by a network of Authorized Builders and Roofers—each of them an experienced professional who can take full single-source responsibility for the success of every project.

For a beautiful, uncompromising and economical solution to your educational building needs, American has the proven answer. For further information, call us or log onto www.americanbuildings.com.
