

ONBUILDING

Churches/Religious Centers

The multifaceted demands on today's religious buildings go far beyond open sanctuaries and roof spires. They include educational facilities, community buildings, offices, dining halls, large meeting rooms, gymnasiums—even video production studios. Also, they include architectural beauty in keeping with their role as places of worship.

There's no better way to achieve the appearance, functionality and versatility goals of religious structures or complexes than with metal building systems by American Buildings Company (ABC). ABC metal building systems typically cut annual heating and cooling bills by 20 to 30 percent compared with other building types. Maintenance is minimized, too.

ONBUILDING

Churches/Religious Centers

ABC buildings offer superior weathertightness, which can be backed by a strong 20-year roof warranty. Buildings are available in two choices of color finishes: ABC's proprietary SmartKote® finishes, available in a wide range of colors that can be warranted for an optional 35 years; and ABC's Silicone-Polyester COOL™ panels, available in 4 great colors, and features a 25-year finish warranty.

ABC metal building systems can be combined with traditional materials to achieve just the architectural appearance you wish.

As one of the industry's leaders, ABC is represented by a network of Authorized Builders. These are highly experienced and qualified Builders who can take single source responsibility for project success.

For religious facilities that combine lasting beauty to economy, there's no better way to build than with a custom-designed ABC metal building system. For further information call us or log onto www.americanbuildings.com.
