AMERICAN  
BUILDINGS

A NUCOR COMPANY

Appearance and working efficiency are central to successful commercial or retail buildings. The complete flexibility offered by American Buildings Company's building systems for exterior appearance, together with convenient and inviting interior layouts, maximize usable space and provide a winning combination and solution for commercial and retail needs.

American Buildings Company (ABC) provides a versatile building solution. Our buildings can range from the basic to more sophisticated look and use of materials, while still providing quick turnaround of product and delivery. ABC uses advanced technology and design techniques to lead the way in building systems.

# ONBUILDING

## Shopping Centers

ABC's building systems can be readily combined with traditional materials such as brick, stone, glass, or wood to meet any appearance requirement, while ABC technology dramatically shortens design, fabrication, and on-site erection time for major cost savings and faster occupancy.

These systems are available in two choices of finishes: SmartKote® color finishes, available in a wide range of colors, can be warranted for an optional 35 years; and Silicone-Polyester COOL™ panels, which are available in 4 great colors, feature a 25-year finish warranty. ABC's metal standing seam roofs are offered with 20-year weathertightness replacement warranties that include both labor and materials.

As part of Nucor Corporation, the largest steel company in the United States, American Buildings Company is one of the most vertically integrated manufacturers. We deliver our systems to the jobsite with our own transportation fleet.

We're represented locally throughout North America by a network of Authorized Builders and Roofers—each of them an experienced professional who can take full single-source responsibility for the success of every project.

For a beautiful, uncompromising and economical solution to your retail center building needs, ABC has the proven answer. For further information, call us or log onto [www.americanbuildings.com](http://www.americanbuildings.com).
