AMERICAN
BUILDINGS

A NUCOR COMPANY

Today's metal building systems from American Buildings Company (ABC) can give your warehouse/distribution facilities a high tech, attractive appearance, as well as meet your needs for rack storage, conveyor or other systems.

Clear span spaces, long bays, mezzanines, high eave heights—any functional requirement can be met precisely. You get maximum usable storage capacity per square foot and maximum operation efficiency.

ONBUILDING

Warehousing & Distribution

Combined with any other material to meet your architectural appearance goals, ABC shortens design, fabrication and on-site erection time dramatically, for major cost savings. ABC buildings offer unsurpassed weathertightness and can be backed by a strong 20-year roof warranty. Buildings are available with Silicone-Polyester COOL™ finish or SmartKote® panels. Both feature durable finishes that resist fading, extend the life of the structure and lower your customer's energy costs.

SP-COOL™ panels are available in 4 colors and feature a 25-year finish warranty. Coated with special "cool" resins that reflect the sun's rays, SP-COOL™ panels are a sensible, practical choice for large warehouses.

SmartKote® PVDF coated panels offer another "cool" option. PVDF resin chemistry is the most durable, long-lasting system on the market. SmartKote® panels are available in a wide range of colors and can be warranted for an optional 35 years.

As one of the leaders in the industry, ABC is represented by a network of Authorized Builders. They're top-quality, highly experienced Builders who can take single source responsibility for project success.

For warehouse and distribution facilities with appearance and performance beyond the ordinary, your ABC Builder has the proven answer. For further information, call us or log onto www.americanbuildings.com.
